Abstract: Currently, there are three hot trends in south Louisiana: the Tuscaloosa Marine Shale, the Wilcox of southwestern Louisiana, and the onshore Subsalt Trend. (of south Louisiana). In addition, a recent hotspot, the West Lake Salvador Complex will be discussed. Examples of these trends will include four fields with significant increases in production in recent years. The presentation will include type logs, production data, current drilling activity, economics and the effects of new technology in these trends and hotspots areas. The major players in each trend will be discussed, including companies like Encana, Devon, Goodrich and Enron Oil & Gas. In the Wilcox Trend, Midstates Petroleum and El-Paso are the most active companies and have drilled more than 100 wells in the past year, resulting in significant increases in oil production. Key Wilcox fields include Pine Prairie, South Bearhead Creek, W. Gordon and N. Coward Gully.

(Mr. Christina’s program received excellent comments at a recent PLANO luncheon on the Northshore.)

Carlo Christina - bio sketch

Carlo C. Christina is a well-known and respected geologist here in New Orleans and south Louisiana. Born in New Orleans he earned a B.S. in geology at Louisiana State University. He served in the U.S. Air Force as a 1st Lieutenant from 1952-54, specializing in radar and electronics.

Mr. Christina is a member of the Society of Professional Earth Scientists (No. 1191); the New Orleans Geological Society, where he served as President, 1989 and was awarded the NOGS Honorary Life Membership in 1991. He received the Gulf Coast Association of Geological Societies' Distinguished Service Award in 1996 and Honorary Membership in 1997.

In 2011 Mr. Christina was inducted into the Louisiana State University College of Science Hall of Distinction. From 2002 to the present he has served as a trustee on the East Jefferson General Hospital’s Foundation Board.
