Society of Independent Professional Earth Scientists
March 2016

Chairman's Column

Last month we had another good turnout for Kelly Hagggar's talk on Geology, Law and Coastal Change, a very complicated subject, with a lot of twists and turns.

This month, Spencer Dussouy will give us a presentation on the Bureau of Ocean Energy Management's (BOEM) roll in monitoring offshore oil and gas activity. Spencer is a reservoir engineer with the agency and is also the grandson of longtime member, Paul Perret.

In April, we will have a change of pace, substituting our regular lunch meeting with a crawfish boil, intended to acquaint potential members with our organization. Eric Broadbridge and Carlo Christina are spearheading this event and details will be sent out in the next few weeks.

Looking further ahead, API has decided to leave the annual joint societies meeting in November rather than move to a summer date, so it will continue to serve as our November meeting.

Roy reports a good dues response, however, some of you are still not current. Check your records!

Louis E. Lemarié

Spencer Dussouy

Gulf of Mexico OCS Region

Tuesday, March 15th

Andrea's - Metairie

Registration & Networking - 11:30 AM

Lunch and Talk - Noon

Reservations and guests: Carol St. Germain - 504-267-3466

Spencer Dussouy is a graduate from Louisiana State University with a minor in Geology and a bachelor's degree in Petroleum Engineering. He has lived in New Orleans his entire life. He went to school at Archbishop Rummel and LSU and has 4+ years working in the industry as a Measuring While Drilling Engineer with Schlumberger, a Production Engineer and Reservoir Engineer with Nexen Petroleum, and as a Reservoir Engineer with BOEM.

At the BOEM, his current engineering duties are in the evaluation of all aspects of oil and gas reservoirs from discovery through depletion.

Assist in compiling, analyzing, and interpreting basic engineering data consisting of induction/electrical logs, acoustic logs, radioactive logs, laboratory analyses of rock and fluid samples, well pressure reports, drilling reports, production reports, and reservoir reports.

Reviewing the validity of operator submitted data and analysis; establishing an independent analysis of geological and engineering attributes that are expected to be encountered in the proposed well bore using selected analogs; generating nodal analysis curves.
